SUMMARY

Aspiring full-stack developer pursuing a Computer Science degree at the University of the People while completing the Workintech Full-Stack Development program. Driven by a strong interest in building user-focused, functional web applications, I am advancing my JavaScript, React, and full-stack development skills through real projects. I am seeking an internship or junior developer role where I can apply my technical foundation within a real engineering team.

SOFTWARE PROJECTS

Garajim — Vehicle Maintenance & Tax Tracker

Full Stack Developer · [React](#) | [Supabase](#) | [PostgreSQL](#)

GitHub: github.com/YusufKosarDev/garajim | Live Demo: garajim-sage.vercel.app

- Built a multi-tenant SaaS architecture on PostgreSQL Row Level Security, enabling users to share their garage workspaces with family or team members.
- Developed real-time data synchronization via WebSocket subscriptions and automated daily email reminders through 5 Deno serverless functions scheduled with pg_cron.
- Implemented a predictive analytics module with Recharts, providing annual cost forecasting, fuel-saving suggestions, and year-over-year comparisons.
- Integrated OpenStreetMap and Leaflet with a three-mirror fallback pattern for CORS resilience, and wrote 10 end-to-end tests with Cypress including session caching.

SubTrack — Subscription & Expense Tracker

Full Stack Developer · [React](#) | [TypeScript](#) | [Node.js](#) | [Express](#) | [PostgreSQL](#)

GitHub: github.com/YusufKosarDev/subtrack | Live Demo: subtrack-psi-nine.vercel.app

- Built a production-grade application as a TypeScript monorepo that displays users' monthly and yearly subscription costs in one place with multi-currency support.
- Implemented a security layer with TOTP-based two-factor authentication (2FA), Google + GitHub OAuth, and server-side JWT revocation via tokenVersion.
- Developed a predictive engine featuring 6-month spend forecasting with linear regression, a payment heatmap, period comparison, and flags for expensive or price-hiked subscriptions.
- Wrote 53 unit tests with Vitest and set up a CI/CD pipeline with Docker and GitHub Actions covering type-check, lint, test, and build steps.

EXPERIENCE

Corendon Airlines, Antalya — Tour Guide

July 2025 - October 2025

- Provided airport transfer, hotel check-in coordination, and destination briefing services to international tourists, including groups of 30+ people.
- Managed multiple tourist groups in parallel during peak season, resolving delays, lost-luggage, and reservation issues on site.
- Coordinated with a 20+ person operations team and ensured multinational customer satisfaction through fluent English communication.

Blue Wave Suite Hotel, Antalya — Front Desk Officer

June 2023 - September 2023

- Responsible for daily check-in/check-out, room reservation management, cash transactions, and coordination of guest requests.
- Handled international guest communication in both Turkish and English, resolving complaints and special requests by priority.
- Developed multitasking discipline to simultaneously manage the reservation system, room status, and billing.
